

AI & Machine Learning Engineer

- **Professional Summary:** Data-driven AI Engineer with 3+ years of experience designing, training, and deploying machine learning models and Generative AI applications. Adept at transforming complex datasets into actionable predictive systems and production-ready NLP architectures. [[1](#), [2](#), [3](#), [4](#), [5](#)]
- **Technical Skills:**
 - *AI / ML Frameworks:* TensorFlow, PyTorch, Scikit-Learn.
 - *Generative AI & LLMs:* Hugging Face, OpenAI API, LangChain, Vector Databases (ChromaDB, Pinecone).
 - *Languages:* Python (NumPy, Pandas), SQL, C++.
 - *Data Engineering:* Apache Spark, Databricks, ETL pipelines. [[1](#), [2](#), [3](#), [4](#), [5](#)]
- **Core Experience:**
 - **AI Developer:** Engineered a custom NLP-driven customer intent engine using Hugging Face and LangChain, improving automated resolution rates by 35%.
 - **Predictive Modeling:** Developed and optimized deep learning classification algorithms using PyTorch, achieving a 94% accuracy rate on text-classification metrics.
 - **MLOps:** Set up automated model training and tracking pipelines using MLflow to streamline model versioning and production rollouts.
